- They will receive plenty of cuddles and special attention
- “Night Checks” and all needs met
- Your dog may chew on or mark their bed
- Your dog *may* not eat for a couple feedings due to acclimating to new surroundings (*This is perfectly NORMAL and the dog typically resumes a normal feeding schedule after they have acclimated to their new surroundings- usually between 0 – 3 days)- this may results in some weight loss.*)
- They will follow a routine as close to their own as possible
- They will have a BLAST playing with others approved pets (or enjoying some alone time if they prefer!) So enjoy your vacation
